

# DBH-12V DUAL BRIDGE MOTOR DRIVER

### **DBH-12V User notes**

PWR+ voltage range: 3V to 13.5V

Internal voltage, Vcc, is powered from PWR+ and is regulated at 13.75V

PWR+ is applied to V+, not valid for controller power.

EN >3V or left open enables drive

VIN thresholds are 1.25V

1uS minimum recommended VIN off-time per cycle to charge boot-strap capacitors

Output current monitor, CT, gain is 155mV/A
